SUMMARY

UI/UX Designer and front-end coder with 6+ years of experience turning complex spaces and services into clear, easy-to-use products, across AI-powered guide systems, large-scale event navigation, e-commerce, and MarTech SaaS. Designs for mobile, 43-inch touch kiosk, and AR in the same product, and ships the front end in HTML/CSS to keep handoff short. Trusted by clients including Foxconn, TTL, the National Museum of History, and Unicharm to turn unclear requests into finished products. Delivered an accessibility-first event app used by 35,000+ guests and a national training platform that reached a 32% sign-up rate.

EXPERIENCE

UI/UX Designer

Oct 2024 – Oct 2025

Omniguider

Taipei, Taiwan

- Led end-to-end design and front-end delivery for Taiwan Tobacco & Liquor's (TTL) Puli Brewery AI Smart Guide System spanning 13 heritage sites in 4 languages; replaced unusable engineering floor plans with hand-drawn 3D maps and a mobile-first component system consistent across mobile web, QR code, and a 43-inch kiosk, so visitors got a seamless experience from a quick phone scan to a full kiosk session, without a separate build for each screen.
- Built the in-app event navigation guide for the Foxconn Carnival at Taipei Dome, adopted by 35,000+ guests across 7 floors, with a barrier-free route mode so guests with mobility needs could navigate quickly and independently to any zone.
- Designed the 4 outdoor AR experiences and a mascot-guided collectible card system for the National Museum of History app during its expansion to four floors, turning the courtyard from a walk-through into a place visitors stopped to explore.
- Ran the UI/UX design of the Fo Guang Shan Buddha Museum AI Guide System from initial bid through build, shaping the design proposal that won the project and carrying the multi-device approach from earlier projects into a new cultural venue.

UI/UX Designer

Aug 2022 – Mar 2024

Gomaji

Taipei, Taiwan

- Designed and hand-coded (HTML/CSS) 20+ responsive e-commerce campaign pages on my own for food, travel, and lifestyle deals, matching key visuals to seasonal and holiday buying trends and sending them straight to production.
- Created point-reward pages and LINE push assets to raise cross-channel engagement and repeat purchases loyalty-wide.
- Led the design and campaign plan for the Maji City Theme Park event, matching the new brand look across the website, on-site signs, and printed materials; the campaign drew 5,000+ visitors with an 80% coupon redemption rate.

Senior Web Designer

Nov 2019 – Apr 2022

AccuHit AI Technology

Taipei, Taiwan

- Designed the Unicharm (MamyPoko) coupon module as a LINE LIFF page linked to the brand's official app, cutting the redemption flow to 3 steps across 6 retail partners so busy parents could claim a coupon in seconds.
- Took course training portals for TAITRA, Taiwan's national trade promotion organization, from wireframe to live HTML/CSS build, reusing one shared template across each new course season and reaching a 32% sign-up rate and 90%+ satisfaction score.
- Produced landing pages for B2B technology events hosted by AMD, Nutanix, and Lenovo, keeping each page within the client's own brand guidelines, and drew original product logos for the company's enterprise MarTech software lines.
- Coded the mobile-first front end in HTML/CSS and worked with the product manager, backend engineers, and a second designer to agree on the interface logic while both systems were built over 6 months, from concept to launch.

Marketing Design Specialist

Apr 2018 – Jul 2019

Pro-Do International

Taipei, Taiwan

- Planned the visual hierarchy and information structure for single-product sales pages and company websites, using top-of-page content, mobile-first layouts, and clear action buttons to improve time on page and click rates.
- Ran Facebook ad creative and A/B tests on layouts, applying results to boost click-through performance company-wide.
- Worked with the marketing and copywriting teams to match each landing page's message to its target audience precisely.

SKILLS

UX Design: User Research, User Journey Mapping, Design Thinking, User Flows, Wireframing, Prototyping, Design Systems, Material Design, Human Interface Guidelines (HIG), Usability Testing, A/B Testing, Responsive Design, Accessibility (WCAG)
